

Assignment 9

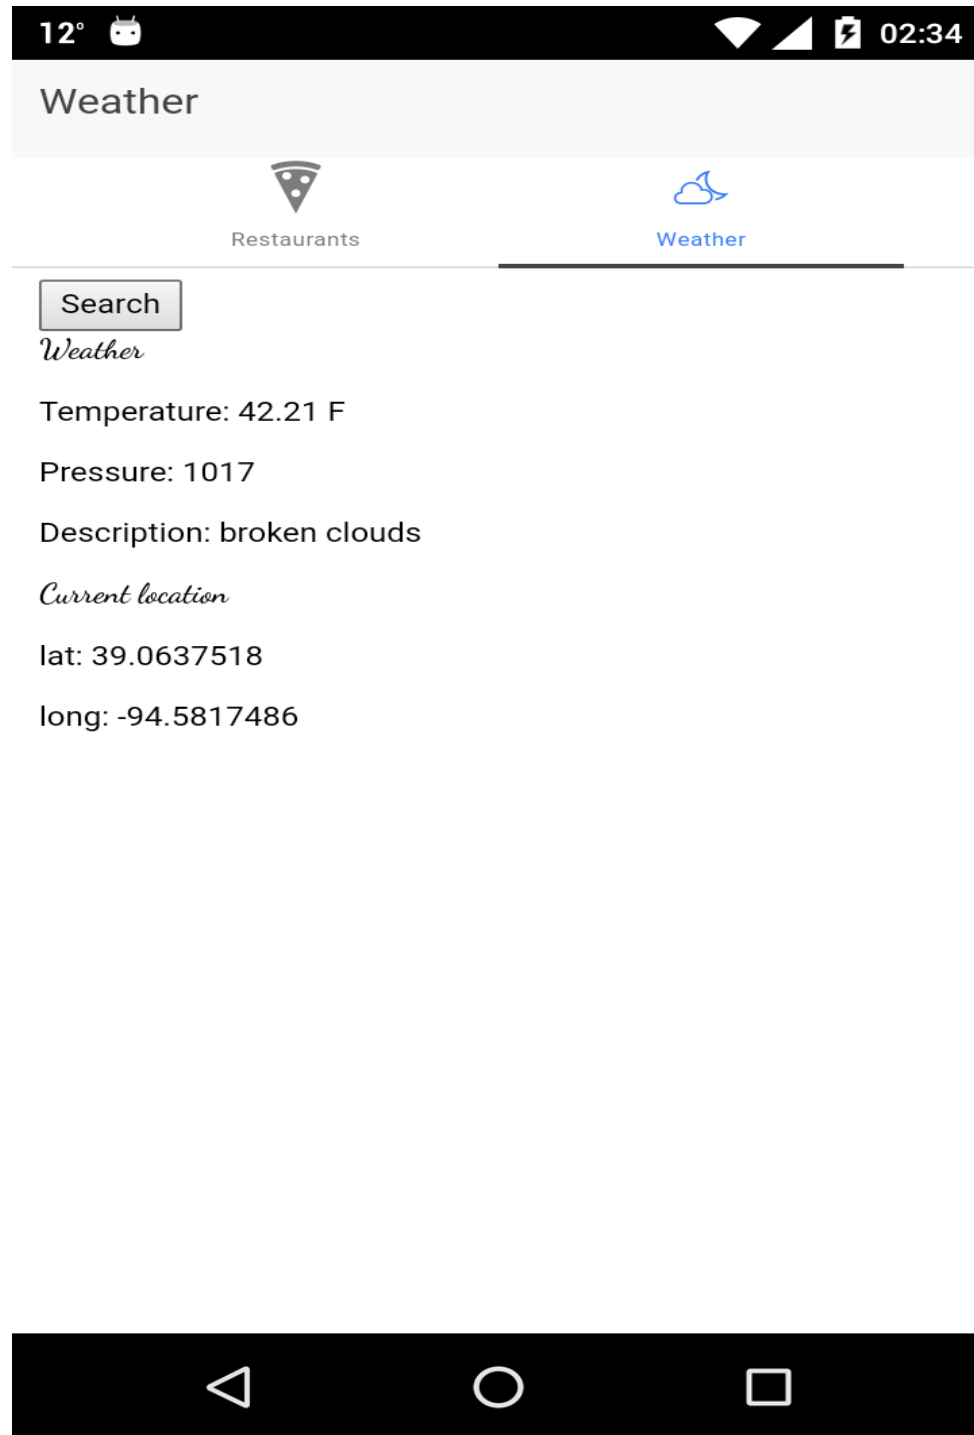

Yslow Screenshot:

The screenshot shows a web browser window with the address bar displaying `localhost:8100/#/tab/chats`. The browser's bookmark bar includes links to 'Apps', 'Bookmarks', 'MyBookings Sprint 20', 'performance - When', 'itext - JAVA: passing', 'REST based File uplo', 'Lenovo', 'CS551 -', '#1 Hello World Using', and 'Other bookmarks'. The page content is titled 'Weather' and includes a search bar, a 'Weather' section with temperature (42.21 F), pressure (1017), and description (broken clouds), and a 'Current location' section with latitude (39.059545199999995) and longitude (-94.57792909999999).

Below the browser window, the YSlow extension interface is visible. The address bar shows `chrome-extension://ninejicohidippngpapiilnmkgllmakh/yslow.html#395`. The interface includes tabs for 'Home', 'Grade', 'Components', and 'Statistics'. The 'Grade' tab is active, showing an overall performance score of 80 and the ruleset 'YSlow(V2)' applied to the URL `http://localhost:8100/#/tab/chats`. A list of 23 items is shown, filtered by 'CONTENT (6)', 'COOKIE (2)', 'CSS (6)', 'IMAGES (2)', 'JAVASCRIPT (4)', and 'SERVER (6)'. The first item is 'B Make fewer HTTP requests', which is expanded to show a 'Grade B on Make fewer HTTP requests' section. This section states: 'This page has 6 external Javascript scripts. Try combining them into one.' and provides advice: 'Decreasing the number of components on a page reduces the number of HTTP requests required to render the page, resulting in faster page loads. Some ways to reduce the number of components include: combine files, combine multiple scripts into one script, combine multiple CSS files into one style sheet, and use CSS Sprites and image maps.' A link to '»Read More' is also present.
